Address Numbers

All new and existing buildings in the city are required by law to have address numbers attached.

The numbers must be plainly visible and legible from the street.

This makes your address identification very simple and direct not only for emergency, fire & police, but also for your friends and neighbors, and in the case of commercial properties, your customers & clients.

Residential numbers must be a minimum of **four (4) inches tall**, and be of a contrasting color, mounted so that they can be easily seen from the street. Trim bushes and shrubs so that they do not hide the numbers.

Commercial numbers must be a minimum of **six (6) inches tall** and be of a contrasting color, mounted so that they can be easily seen from the street.

The law is the Standard Fire prevention Code, Section 603.18
